

FORMED / *concrete basins*

BRACKET FITTINGS

Where a basin is to be wall mounted we can supply steel bracket designed and made exclusively for our concrete basins.

DO's

- Recess the bracket 15-20mm (3/5 - 3/4in) below the finished wall surface.
- Ensure fixing into a suitable wall substrate such as stud or block wall.
- Use multiple 100mm+ (4in +) screws.
- Position brackets to allow for finished basin surface height position.

DONT'S

- Fix directly to plasterboard alone.
- Cut or remove part of the steel bracket.
- Fix onto an unstable wall.
