### Product Care

- ◆ Our finishes can be delicate and require both drying after use as well as careful & regular cleaning routines.
  - ◆ Normal cleaning should only be done with mild liquid soap in warm water, applied with a soft cloth
  - ◆ Mineral build-up can be removed with warm water, applied with a microfibre cloth and then rinsed.
  - ◆ Periodic application of wax or polish will help reduce mineral based standing water marks.
  - ◆ Cleaning products containing bleach or solvents should NOT be used as this can permanently discolour the concrete and damage the sealant.
  - ◆ Abrasive cleaning materials should NOT be used.
  - ◆ Periodically apply polish/wax as specified in the care instructions to maintain appearance.
  - ◆ Alternatively the surface can be re-oiled in place of periodic wax / polish applications using our Eco-Sealant based on plants and vegetable oils. Contact us to discuss your requirements.
